constructed from either braced sheet-steel or cast iron that held either an ordinary V-belt transmission or a rather complex variable-speed drive. The lathe was current from the early 1950s to the 1970s and sold under various Model designations. Screwcutting was by a gearbox with two sliding levers instead of the single lever of the previous model. A complete 110-page Data Pack including: Operation & Maintenance Manual ...

The catalog model numbers reflected the bed length - and the lathe was available as either a "3800" or "4400" Series machine. The 10-inch lathe was appeared in England, badged as the Challenger with a claim that it was "All British". If this was true is unknown, but one suspects, as the main casting appear identical - and the Challenger badges are either screwed on or cast into easily changed parts such as changewheel covers - that it was not.
