FANUC arc welding robots' slim wrist design makes them ideal for use in many different industries. They are widely used in the automotive sector, especially TIER 1 for welding seats, axles and other components. Hollow wrist and arm ARC Mate's hollow wrist enables it to access narrow spaces and cuts costs by minimising wear and tear on welding cables. Offline programming makes it easier to ...

FANUC Arc Welding Robots

FANUC Robotics' ServoTorch is a fully-integrated, servo-controlled, wrist-mounted, four-roll (4) "Pull" wire feeder controlled by the ARC Mate® series robots. The design is optimized to feed aluminum and soft wire. The drive motor is a proven FANUC high torque servo motor with a pulling capacity suitable for unassisted wire feeding from conventional spools or pay-off packs.
