True heroes who will win your heart. Honor, duty, courage, passion . . . the men of the Navy SEALs are a special breed of hero, and in these stories by eighteen top romance authors the SEALs are celebrated not only as symbols of devoted service to their country but as the kind of man every woman wants to love. They'll rescue a damsel in distress and her lap dog, too. They'll battle hometown dramas and international bad guys. When it comes to giving away their hearts, they'll risk everything. All proceeds from sales of SEAL of My Dreams goes to the Veterans Research Corporation, a non-profit fundraiser for veterans' medical research. Among them, the authors of SEAL of My Dreams have won dozens of writing awards including multiple RITAs from Romance Writers of America. Their nearly 600 published novels have sold at least 25 million copies worldwide. The SEAL of My Dreams roster includes many of the best-known authors in modern romance fiction. In addition, many have strong family connections to the servicemen and women of our nation's military, and many specialize in novels featuring heroes and heroines from all branches of service. Visit the authors at sealofmydreams.com.

With the narrative punch of Jonathan Harr 's A Civil Action and the commitment to environmental truth-telling of Erin Brockovich, The Fluoride Deception documents a powerful connection between big corporations, the U.S. military, and the historic reassurances of fluoride safety provided by the nation 's public health establishment. The Fluoride Deception reads like a thriller, but one supported by two hundred pages of source notes, years of investigative reporting, scores of scientist interviews, and archival research in places such as the newly opened files of the Manhattan Project and the Atomic Energy Commission. The book is nothing less than an exhumation of one of the great secret narratives of the industrial era: how a grim workplace poison and the most damaging environmental pollutant of the cold war was added to our drinking water and toothpaste.

Your remarkable life is happening right here, right now. You may not be able to see it — your life may seem predictable and your work insignificant until you look at your life as Frederick Buechner does. Based on a series of mostly unpublished lectures, Frederick Buechner reveals how to stop, look, and listen to your life. He reflects on how both art and faith teach us how to pay attention to the remarkableness right in front of us, to watch for the greatness in the ordinary, and to use our imaginations to see the greatness in others and love

them well. As you learn to listen to your life and what God is doing in it, you will uncover the plot of your life ' s story and the sacred opportunity to connect with the Divine in each moment.

Short term interest rate futures (STIR futures) are one of the largest financial markets in the world. The two main contracts, the Eurodollar and Euribor, regularly trade in excess of one trillion dollars and euros of US and European interest rates each day. STIR futures are also unique because their structure encourages spread and strategy trading, offering a risk reward profile incomparable to other financial markets. STIR futures are traded on a completely electronic market place that provides a level playing field, meaning that the individual can compete on exactly the same terms as banks and institutions. The sheer number of trading permutations allows traders to find their own niche. 'STIR Futures' is a handbook to the STIR futures markets, clearly explaining what they are, how they can be traded, and where the profit opportunities are. The book has been written for aspiring traders and also for experienced traders looking for new markets. This book offers a unique look at a significant but often overlooked financial instrument. By focusing exclusively on this market, the author provides a comprehensive guide to trading STIR futures. He covers key points such as how STIR futures are priced, the need to understand what is driving the markets and causing the price action, and provides in-depth detail and trading examples of the intra-contract spread market and cross-market trading opportunities of trading STIR futures against other financial products. An essential read for anyone involved in this market.
