The heartfelt and hilarious, international bestselling debut about having it all without losing your mind. Sophie Whelan is the kind of woman who prides herself on doing it all. In a single day, she can host a vegan-friendly and lactose-free dinner for ten, thwart a PTA president intent on forcing her to volunteer, and outwit her hostile ‘ assistant ’ in order to get her work done on time. With her fortieth birthday looming, and her carefully coordinated existence beginning to come apart at the seams, Sophie begins feeling like she needs more from her life—and especially from her husband, Jesse. The last thing Sophie needs is a new complication in her life. But when an opportunity from her past suddenly reappears, Sophie is forced to confront the choices she ’ s made and decide if her chaotic life is really a dream come true—or the biggest mistake she ’ s ever made...

This very original, inspirational book globalises our understanding of languages in education and changes our understanding of bilingual and multilingual education from something mostly western to being truly transnational: it spotlights the small, celebrates African and Asian cases of multilingual classrooms and demonstrates that such education is universally successful. Colin R. Baker, Pro Vice-Chancellor, Bangor University, Bangor, Wales, UK A norm-setting work on multilingual education, which combines theoretical perspectives with practical experience from different parts of the globe, this book demonstrates convincingly not only that multilingual education works, but also that, for most developing countries, there is no viable alternative. Ayo Bamgbose, Professor Emeritus, University of Ibadan, Nigeria This excellent volume brings to light the fascinating lived experiences of multilingual education in linguistically rich but resource impoverished countries, and offers important lessons from which we can all learn. Amy B. M. Tsui, Professor , Pro Vice-Chancellor & Vice President, The University of Hong Kong, Hong Kong This is a book of hope and inspiration. Documenting the significant shift that is taking place in

countries around the world in the status and legitimacy of mother tongue-based multilingual education, it represents a giant step towards a "tipping point" where mother tongue-based multilingual education will be normalized as the preferred and, in fact, common sense option for educating the children of the world. Jim Cummins, The University of Toronto, Canada This important book challenges us to think about multilingual education from a different angle – – this time putting the periphery at the center. The effect is one of destabilizing old visions and imagining new worlds where multilingual education provides the backdrop for generous understandings of all peoples. Ofelia Garc í a, Program in Urban Education, Graduate Center/The City University of New York, USA There are regrettably few detailed accounts of successful elementary school instruction in the pupils' home language, which makes this book with its surprising examples (especially Ethiopia and Nepal but other third world cases) so relevant. Students of language education policy will learn a great deal about the possibility of multilingual education from the chapters of this important book. Bernard Spolsky, Professor Emeritus, Bar-Ilan University, Israel At least half of today ' s languages are marginalised and endangered and the attention of the world needs to be focused on these minor and minority languages together with the value of multilingualism. If the book succeeds in enhancing the consciousness of the world towards predicaments of the third world, then its efforts will have been amply rewarded. Debi Prasanna Pattanayak, Former Director, Central Institute of Indian Languages, India Drawing on the most powerful and compelling research data to date and connecting this research to linguistic human rights, this book explores the conditions and practices of robust bilingual and multilingual educational innovations in both system-wide and minority-settings and what it is that makes these viable. It demonstrates how, in countries where educational practices are inclusive of linguistic diversity and responsive to local conditions and community participation, implementation of bilingual education even within limited budgetary investment can be successful.

The wonder of nighttime comes to life in this breathtaking debut *When the Insomniacs* move twelve time zones away for Mrs. Insomniac's new job, the family has an impossible time adapting to the change. They try everything to fall asleep at night--take hot baths, count to one thousand, sip mugs of milk--but nothing helps. Venturing out into the dark, they learn there is a whole world still awake and a beauty in their new and unconventional schedule. Ideal for bedtime reading, this gorgeous and lyrical story celebrates nighttime's mystery and magic.

First published in 1995. Routledge is an imprint of Taylor & Francis, an informa company.

The 2007/2010 global financial crisis re-opened the debate on the reform of the international monetary and financial system. This well-argued book demonstrates the strategic role of international economic law (IEL) in ensuring international monetary stability and global financial stability. After discussing the current allocation of powers among IEL institutions, Annamaria Viterbo focuses on monetary measures: exchange restrictions, capital controls and exchange rate manipulations. These three fundamental topics are then examined through the lens of a multi-layered methodology, adopting perspectives from international monetary law, trade law and investment law. The author evaluates how the horizontal sectors in which IEL is traditionally divided interact and how conflicts between norms are avoided or solved. Particular attention is also devoted to the outcomes of trade and investment disputes that deal with monetary measures. *International Economic Law and Monetary Measures* will appeal to international trade law and international financial law scholars as well as law and business students. Legal practitioners and officials working in the field of international economic law will find it a useful reference, as will legal counsel in banks and financial institutions, international investors and multinational corporations.

High interest-low vocabulary books.

Epistemology delivers truths, metaphysics offers realities. In this book, aesthetics responds philosophically to the question about what one is to make of such truths and realities. How to live with them, or how to weave them together in the fabric of the self. In this sense, any aesthetics about art, beauty, and the like is translatable into a 'kalology' about degrees of meaning and layers of identity. The starting point for the book is Nelson Goodman's theory of symbols. A theory with modest aspirations that can only serve as an initial step, but a step in the right direction.
