This course is for health professionals and health researchers who want to understand the basics of health economics and its relevance to the health service. No previous knowledge of economics is required.

Introduction to Health Economic Evaluation (IHEE) — Health ...

Undoubtedly, decision making in health care is a multidisciplinary affair that must incorporate many different values and perspectives from patients, health professionals, health policy makers, the general public etc. Economic evaluation can make this more transparent and provide a normative view as to how these decisions should be made.

Economic Evaluation in Health Care ... - Oxford Academic

Health at the core: Health objectives are at the centre of the activity, for example tobacco reduction policies or mandatory seat belt legislation.. Win-win: The aim is to find policies and action that benefit all parties, such as providing healthy school lunches that promote learning and health.. Co-operation: Emphasis is on systematic co-operation between health and other sectors which ...

10.1093/med/9780199696758.003.0186 Evaluation is the basis for improving care to people with mental illness. It is vital to know whether interventions are beneficial or harmful, and whether they offer value for money. Mental health interventions need to be understood both in terms of their active ingredients and how they fit within their context.
