Feature Specific Mechanisms In The Human Brain Studying ...

Specific Defense Mechanisms against Infectious Agents: The humoral and cell-mediated immune defense mechanisms induced against an infectious agent are specific in nature, i.e. the specific immune mechanisms act only against the microbe against which the responses were induced and not against other microbes. Defense through Humoral Immune Responses:

Specific and Non-Specific Defense Mechanism Against ...

ADVERTISEMENTS: Specific defense mechanism is the ability of the body to develop immunity against specific pathogens, toxins or foreign things. This is possible by a special immune system that produces antibodies and/or activated lymphocytes that attack and destroy specific invading organisms or toxins. Specific defense mechanisms are also referred to as adaptive or acquired immunity (Table 1).
