Making Maps with R Intro. For a long time, R has had a relatively simple mechanism, via the `maps` package, for making simple outlines of maps and plotting lat-long points and paths on them.. More recently, with the advent of packages like `sp`, `rgdal`, and `rgeos`, R has been acquiring much of the functionality of traditional GIS packages (like ArcGIS, etc.). This is an exciting development, but ...

The primary purpose of heat maps is to visualize website user behavior. By looking at an aggregate of all user interactions on a web page, it becomes easier to spot issues and opportunities for improvement. Heat maps are also a great first step for further user behavior research, like viewing session recordings and collecting survey feedback.
