Linux 5.8 has been released on Sun, 2 Aug 2020.. Summary: This release adds: memory management changes to improve the behaviour of systems under thrashing situations; a event notification mechanism built on top of standard pipes that splices messages from the kernel into pipes opened by userspace; support for having different procs mounts with different mount

Ubuntu Linux Toolbox is a type of reference book that is helpful when using the Linux command line that lies behind the colorful Ubuntu GUI. The book is intended for intermediate users learning their way around Linux or advanced users that might need an occasional reminder of some fact or command. I liked the way the book is organized.
