Meathooked The History And Science

In Meathooked, science writer Marta Zaraska explores what she calls the "meat puzzle": our love of meat, despite its harmful effects. Zaraska takes us on a witty tour of meat cultures around the world, stopping in India's unusual steakhouses, animal sacrifices at temples in Benin, and labs in the Netherlands that grow meat in petri dishes.

Meathooked: The History and Science of Our 2.5-Million ...

"Meathooked" is a riveting investigation of the human relationship with meat throughout history, and sheds light on the impact this relationship will have in the future. While the author states she is a vegetarian, this text is not an attempt to convince use all to be, but rather a focus on the views on meat in different countries, cultures, and time periods.
