Everything you need to know to pass Microsoft's tough TCP/IP exam 70-059. Comprehensive coverage of IP addressing and routing. Detailed DHCP, WINS and DNS coverage -- everything you need to implement, administer, and troubleshoot Microsoft TCP/IP networks. A total learning solution! Includes free CBT Systems Windows NT training module worth \$225, companion Web site featuring extra quizzes, and valuable training discounts at Scholars.com! More than just a " cram guide," this is a complete, expert guide to planning, implementing, managing, and troubleshooting even the largest Windows NT-based TCP/IP networks. You'll find comprehensive coverage of every key Microsoft TCP/IP tool, service, and protocol. Understand the key IP addressing and routing skills and technologies at the heart of every TCP/IP network, including extensive coverage of subnetting and supernetting. Next, master Microsoft's implementations of DHCP and DNS, along with the Windows Internet Name Service (WINS) for Windows networks. From planning through troubleshooting, for both Windows-oriented and heterogeneous environments, this is the most comprehensive real-world Microsoft TCP/IP resource you can find. Kostya Ryzkin, Dave Houds, and Tim Hoffman, all MCSEs and MCTs (Microsoft Certified Trainers), are training specialists with Aida Connection, a Microsoft Certified Solutions Provider based in Nashua, NH

Each Training Course combines a best-selling reference book with a multimedia, interactive CD-ROM Cyber Classroom. The Cyber Classrooms are built in conjunction with the accompanying book for integrated use and provide hours of instructor audio, interactive quizzes and much more. Each programming course includes thousands of lines of Live code, while our administration courses contain instructive videos demonstrating key system tasks. Our courses also feature fully searchable e-book copies of the print book included with the Course.

There are hot new jobs in the exploding computer field, but how do you get to them, and how do you present yourself in the most favorable light so that you can be considered for the best jobs? This is the book you need if you want a resume that will help you enter or advance in the computer field. You'll find words and job titles which are meaningful only in this industry, and you'll make sure that your resume "talks the talk" of the computer field. Get the resume book that will help you professionally talk in language such as the following: network engineer; local area network (LAN); wide area network (WAN); Microsoft Certified System Engineer (MCSE); management information system (MIS); fiber optics; C++; UNIX; software; hardware; network switching manager; wire and cable systems installer; switching them chief; technical inspector; and many other technical terms and job titles designed to communicate in the lingo of the computer field so that you will have an edge in the job market.

This book is designed to help people who seek their first federal government job as well as federal employees who want to advance in the system. The process of getting a government job often involves preparing complex applications or specialized resumes which include the " resumix." One complication of the federal hiring process is that the resume used for federal employment is not the same as the resume used to obtain civilian employment. This book shows examples of effective federal resumes and " resumix" that have worked for real people. The book doesn't simply "tell how" to write the resumix or federal resume, it actually "shows how" to write effective federal resumes in sample after sample related to multiple fields. This book will do a great deal to make the federal hiring process understandable as it illuminates one of the most complex features of getting a government job: writing the federal resume or resumix. In addition to the federal resume, application for federal employment can be made by preparing the Optional Form 612 (OF 612). This book also contains examples of the 612 application.

Covering key topics addressed on the TCP/IP exam 70-059, this book provides two practice exams that assess the reader's readiness for the exam and features practice questions in the format of the actual test. The authors cover TCP/IP architechure, installation and configuration, TCP/IP addresses and how they are used for routing and IP, subnet masking, NetBIOS, WINS, SNMP, and DNS.

This course provides self-paced learners with the skills and knowledge required to install, configure, support, and troubleshoot Microsoft Windows 98 in stand-alone and network environments. This training kit meets all of the objectives for the corresponding MCP exam, and is the most complete, all-in-one skills transfer and exam guide available.

Through hands-on, comprehensive tutorials and self-assessment tools, a self-paced training course supplies users with the skills and knowledge necessary to install, configure, support, and troubleshoot Windows 98 by itself and in a variety of network environments. Original. (Advanced)

The perfect resource for learning from the ground up, Eckert's HANDS-ON MICROSOFT WINDOWS SERVER 2019 is designed to build a foundation in basic server administration -- no prior server experience required. It covers all of the core Windows Server 2019 features using a logical topic flow and step-by-step exercises that can be performed within a home or college lab environment, making it an ideal choice for a Windows Server 2019 administration course. It teaches you how to deploy Windows Server 2019 in a variety of settings, including data center and cloud environments that rely on virtualization and containers. It also covers configuring and managing server storage, troubleshooting performance issues as well as working with common Windows Server technologies and network services, including Active Directory, DNS, DHCP, IPAM, file sharing, printing and remote access.
