Alaska? How do regulators try to convince people that everyone can be evacuated from congested Long Island after a nuclear power plant destroys itself? Lee Clarke enters the world of managers and experts to find out how governments and corporations plan for massive disaster when they have no clue as to how to go about it. He argues that managers create plans that are "fantasy documents," rhetorical tools that are used to convince audiences that experts are in charge and that all is well. Provocative and written for a general audience, *Mission Improbable* makes the case that society would be safer, smarter, and fairer if organizations would admit their limitations.

This study evaluates the 1927 Great Mississippi Flood and its impact on both the 1928 and 1932 presidential elections. Herbert Hoover surged forth to win the 1928 presidency, but would suffer the greatest presidential defeat four years later. When did people change their minds? And were they influenced solely by the Great Depression or was there something else? Natural disasters and environmental crises offer both opportunities and threats for a presidential candidate. Challenger and incumbent must weave through a delicate maze of policy conundrums to garner national support. Today, the novel virus COVID-19 has altered modern society. Policy and medical experts are scrambling to develop a vaccine. Undoubtedly,

economic, social, and political landscapes are being redefined, including their impact on presidential elections. Thus, a seminal question surfaces: How do force majeure events impact a political campaign? Other studies have yielded general assessments regarding presidential decision making during unforeseen events, notably with 9/11 and Hurricane Katrina. This book offers a vanguard approach by applying a historical lens and seeking to test the axiom of Farley's Law. This important law suggests that peoples' minds are made up at least six months before a national election and no matter how poorly situations develop, party allegiance is supreme.

If you like Dr. Who, you'll love Mission Improbable. Carrie Hatchett's been a dog walker, ice cream seller and birthday grace girl—the clean kind. All she wants is a proper job. But Transgalactic Intercultural Community Crisis Liaison Officer isn't what she had in mind. And neither is saving the galaxy. Carrie's a low-achieving daydreamer. After providing a good home for her butt-ugly dog ??and crazy cat, her biggest challenge in life is to avoid being fired, again. But a strange green mist sucks her underlying her kitchen sink, and an unusual clerical error leads to an offer she foolishly doesn't refuse. In settling a conflict between the mechanical placktoids and the mysterious ootoon, Carrie reveals a threat to the

A child's very first word is a miraculous sound, the opening note in a lifelong symphony. Most parents never forget the moment. But that first word is soon followed by a second and a third, and by the age of three, children are typically learning ten new words every day and speaking in complete sentences. The process seems effortless, and for children, it is. But how exactly does it happen? How do children learn language? And why is it so much harder to do later in life? Drawing on cutting-edge developments in biology, neurology, psychology, and linguistics, Charles Yang's *The Infinite Gift* takes us inside the astonishingly complex but largely subconscious process by which children learn to talk and to understand the spoken word. Yang illuminates the rich mysteries of language: why French newborns already prefer the sound of French to English; why baby-talk, though often unintelligible, makes perfect linguistic sense; why babies born deaf still babble -- but with their hands; why the grammars of some languages may be evolutionarily stronger than others; and why one of the brain's earliest achievements may in fact be its most complex. Yang also puts forth an exciting new

theory. Building on Noam Chomsky's notion of a universal grammar -- the idea that every human being is born with an intuitive grasp of grammar -- Yang argues that we learn our native languages in part by unlearning the grammars of all the rest. This means that the next time you hear a child make a grammatical mistake, it may not be a mistake at all; his or her grammar may be perfectly correct in Chinese or Navajo or ancient Greek. This is the brain's way of testing its options as it searches for the local and thus correct grammar -- and then discards all the wrong ones. And we humans, Yang shows, are not the only creatures who learn this way. In fact, learning by unlearning may be an ancient evolutionary mechanism that runs throughout the animal kingdom. Thus, babies learn to talk in much the same way that birds learn to sing. Enlivened by Yang's experiences with his own young son, *The Infinite Gift* is as charming as it is challenging, as thoughtful as it is thought-provoking. An absorbing read for parents, educators, and anyone who has ever wondered about the origins of that uniquely human gift: our ability to speak and, just as miraculous, to understand one another.

Gabe Griffin, the best man to his multimillionaire scientist brother Gavin, would rather return to the field as an elite Delta Force soldier than think about marriage—especially between his brother and

some self-absorbed, status-seeking woman like Tiffany. But the task of delivering the dress and the designer has fallen into his hands. Fashion designer, Lauren Harrison, dreads nothing more than yet another wedding—particularly that she has “agreed” to design the dress for her half-sister during the Christmas season. Alongside Lauren’s bridezilla sister, the country wedding only gets worse when she is forced to interact with Gabe, her secret crush, as he transports the dress and her to the venue, due to the raging blizzard. Sparks fly, but will the close proximity change their minds about love? Or will Gabe’s mission to prevent his brother’s wedding with her help thwart Lauren’s high school fantasies? Enjoy this contemporary romance of holiday fun, set against the backdrop of the remote Eastern Washington countryside! From the internationally bestselling authors who brought you the Krinar Chronicles comes a captivating tale of intrigue, love, and danger in a world where sorcery is entwined with science . . . Once a respected member of the Sorcerer Council and now an outcast, Blaise has spent the last year of his life working on a special magical object. The goal is to allow anyone to do magic, not just the sorcerer elite. The outcome of his quest is unlike anything he could've ever imagined - because, instead of an object, he creates Her. She is Gala, and she is anything but inanimate. Born in the Spell Realm, she is beautiful and highly intelligent - and nobody knows what she's capable of. She will do anything to experience the world . . . even leave the man she is beginning to fall for. Augusta, a powerful sorceress and Blaise's former fiancée, sees Blaise's deed as the ultimate hubris and Gala as an abomination that must be destroyed. In her quest to save the human race, Augusta will forge new alliances, becoming tangled in a web of intrigue that stretches further than any of

Delta Operator Aiden Foster was more than willing to do a favor for his buddy, but why did it have to be guarding a spoiled debutante? Aiden has zero interest in babysitting a rich girl for a week, but when he meets the reserved scientist, his opinion does an about-face. When Chinese terrorists kidnap Jordan's sister, it's assumed the girls' billionaire father will be asked for ransom. Instead, the kidnappers want something that could lead to an international disaster. Once Jordan and Aiden discover she's been betrayed by someone close to her, there's no one to trust but each other. With Daddy's money, life could have been one continuous party for Seattle socialite Jordan Dean. Instead she chose college and a career. She doesn't have time for love or men—not with work and the responsibilities of raising her younger sister. But when her sister is kidnapped and a sexy Special Ops bodyguard is suddenly thrust into her life, Jordan must let go of her tightly controlled world and accept help from the one man who poses a huge risk to her well-guarded heart. Time is already running out, but when Jordan is taken hostage too, Aiden is faced with near impossible odds. Can his beautiful woman use her brains to keep herself and her sister alive long enough for him find them? Mission:
