Operations Research and Supply Chain Optimisation The migration was logical. If an OR model can calculate the optimal location for a ballistic missile, ensuring that the distance to all potential target points is minimised, then of course it can also calculate the optimal position for a distribution centre , ensuring the distance to all customers is minimised.

students aiming to write up a paper in the discipline.

## 37 Research Topics in Procurement and Supply Chain Management

Supply-chain operations reference model is a process reference model developed and endorsed by the Supply Chain Council as the cross-industry, standard diagnostic tool for supply chain management. The SCOR model describes the business activities associated with satisfying a customer's demand, which include plan, source, make, deliver, return and enable. Use of the model includes analyzing the current state of a company's processes and goals, quantifying operational performance, and comparing com
