'Feinstein's triumph is to write so well that she makes Lena's predicament not only moving, in a perfunctory dismissive way, but also painful ... [she has] an accurate and acute feeling for language, and pauses, and silence.' Guardian Lena's seemingly contented family life is coming apart at the seams. Her husband Ben has been having an affair with the au pair, and as their relationship slides he retreats more and more into his work in a science lab. Sons Alan and Michael may appear happy enough, but this is far from the case - both are responding to a physical world which they alone inhabit. And Lena - desperately lost and seeking an identity of her own, both inside and outside of her family unit - increasingly finds solace at the bottom of a bottle. An exploration of just how lonely - and how magic - a marriage can be, The Circle is a poignant, poetic and incredibly assured debut novel.

Never in human history has there been an event more horrifying than the Holocaust—the human loss inconceivable, the aftershocks felt for generations. But in the midst of the misery was forged a strength of spirit and humanity that shows in the faces and stories of survivors. Captured here with clarity and truth are fifty images of survival, portraits of the men and women who actually lived through the brutality. The tales of survival vary: the misery of day-to-day existence in the camps; the luxury and guilt of passing as a non-Jew; the ever-mounting dread of having a hiding place raided by the SS; the chaos of families fleeing, broken and scattered. Punctuating the narratives throughout the book are impassioned essays by Abe Foxman, Yaffa Eliach, Anne Roiphe, Rabbi Arthur Hertzberg, Eva Fogelman, and others. An introduction by National Book Award–winner Robert Jay Lifton opens the text. Taken together, this powerful collection of words and images forms a moving testimony to human dignity and a record of history that must never be forgotten.

Now in its Ninth Edition, *Essentials of Human Anatomy & Physiology* continues to set the standard for short-course A&P texts with an enhanced media package, an updated art program, and new "active learning" features that help allied health students better visualize and understand the structure and function of the human body. Elaine Marieb's clear and friendly writing style emphasizes the relevance of anatomy and physiology to students' lives and careers. It clarifies concepts, defines key terms, and offers just the right balance of anatomy, physiology, and clinical coverage to make the content complete without being overwhelming. While many authors merely condense a two-semester text to meet a one-semester need, Elaine Marieb wrote this book specifically for the one-semester course and continues to carefully select a range of material that proves just right for the shorter course. New information on hot topics like DNA fingerprinting, contraception, stem cell research, and obesity draws students into the material, while a flexible topic structure allows instructors to choose a chapter sequence to meet virtually any need. CourseSmart textbooks do not include any media or print supplements that come packaged with the bound book.
