Economic liberalisation associated with globalisation is causing a pervasive growth of economic insecurity experienced all over the world. This is placing urgent demands on policymakers to rethink old policies and institutions. This book sets out a new approach to the assessment of income dynamics, based on identifying the diverse components of people ' s income and entitlements. It defines ' social income ' as a broader concept of household income which includes state, community and private benefits. It shows how those components should be measured and provides a composite picture of the structure of incomes and support systems of different societal groups. It recognises how the structure of income, as well as its distribution, has been linked to policy and development dynamics. It starts from a premise that unless the totality of incomes and income support systems is taken into account, academics and policymakers cannot expect to develop appropriate interventions. This perspective is developed though a detailed household survey conducted in rural and urban areas of Gujarat in 2007 – 2008. This provides an up-to-date picture of how institutions, NGOs and the state system are operating in the context of rapid restructuring of village life in India.

Why are some parts of the world so rich and others so poor? Why did the Industrial Revolution--and the unprecedented economic growth that came with it--occur in eighteenth-century England, and not at some other time, or in some other place? Why didn't industrialization make the whole world rich--and why did it make large parts of the world even poorer? In *A Farewell to Alms*, Gregory Clark tackles these profound questions and suggests a new and provocative way in which culture--not exploitation, geography, or resources--explains the wealth, and the poverty, of nations. Countering the prevailing theory that the Industrial Revolution was sparked by the sudden development of stable political, legal, and economic institutions in seventeenth-century Europe, Clark shows that such institutions existed long before industrialization. He argues instead that these institutions gradually led to deep cultural changes by encouraging people to abandon hunter-gatherer instincts--violence, impatience, and economy of effort--and adopt economic habits--hard work, rationality, and education. The problem, Clark says, is that only societies that have long histories of settlement and security seem to develop the cultural characteristics and effective workforces that enable economic growth. For the many societies that have not enjoyed long periods of stability, industrialization has not been a blessing. Clark also dissects the notion, championed by Jared Diamond in *Guns, Germs, and Steel*, that natural endowments such as geography account for differences in the wealth of nations. A brilliant and sobering challenge to the idea that poor societies can be economically developed through outside intervention, *A Farewell to Alms* may change the way global economic history is understood.
