The urethra is part of the reproductive system. c. The gametes are formed by meiosis. d. Production of gametes begins during fetal life.

Reproductive System questions Flashcards | Quizlet

Both male and female reproductive systems have internal and external structures. Reproductive organs are considered to be either primary or secondary organs based on their role. The primary reproductive organs of either system are called gonads (ovaries and testes) and these are responsible for gamete (sperm and egg cell) and hormone production. Other reproductive structures and organs are considered secondary reproductive structures and they aid in the growth and maturation of gametes and ...
