I've been buying Sierra Club Wilderness calendars since at least 1980. Before I purchased the 2019 calendar, I looked at a few of the reviews and noticed that some of the negative ones talk about the paper getting thinner over the years. Since we save past calendars (that's how we used to keep track of daily events), I thought I'd take a rather unscientific look at the calendar thickness over ...

The bird book for birders and nonbirders alike that will excite and inspire by providing a new and deeper understanding of what common, mostly backyard, birds are doing--and why "Can birds smell?" "Is this the same cardinal that was at my feeder last year?" "Do robins 'hear' worms?" In *What It's Like to Be a Bird*, David Sibley answers the most frequently asked questions about the birds we see most often. This special, large-format volume is geared as much to nonbirders as it is to the out-and-out obsessed, covering more than two hundred species and including more than 330 new illustrations by the author. While its focus is on familiar backyard birds--blue jays, nuthatches, chickadees--it also examines certain species that can be fairly easily observed, such as the seashore-dwelling Atlantic puffin. David Sibley's exacting artwork and wide-ranging expertise bring observed behaviors vividly to life. (For most species, the primary illustration is reproduced life-sized.) And while the text is aimed at adults--including fascinating new scientific research on the myriad ways birds have adapted to environmental changes--it is nontechnical, making it the perfect occasion for parents and grandparents to share their love of birds with young children, who will delight in the big, full-color illustrations of birds in action. Unlike any other book he has written, *What It's Like to Be a Bird* is poised to bring a whole new audience to David Sibley's world of birds.

In our fast-paced world of technology, where populations are becoming more urbanized and life is increasingly experienced on electronic screens, people are losing their connection to nature. Yet nature is all around us, especially if you live in the Chicago area. Unfortunately, few Chicagoans know it's there. In *My Journey into the Wilds of Chicago*, photographer and humorist Mike MacDonald takes you on a trip to

Read Online Sierra Club Wilderness Calendar 2019

Chicago's wild side--a verdant, untamed Chicago that has been there all along, just waiting to be explored. Combining breathtaking images and imaginative prose, MacDonald leads you on an adventure into wondrous, enchanted lands located just up the road from home, work, and school. From kaleidoscopic tallgrass prairies to the open canopies of rare oak savannas, from the free-flying expanse of the butterfly to the mysterious world of the coyote, startling photographs of a vast and scenic Chicago evoke astonishment and delight with every turn of the page. MacDonald's contagious enthusiasm and decades of comedy experience are channeled into inventive essays, captions, and poetry that engage the imagination and add richness to your journey. This inspirational volume invites readers to cross the threshold, to get off their couches and abandon their screens, to come out into nature and play.

To see Virginia is to visit our nation's beginnings, the very place where, in 1607, English colonists established Jamestown, the first permanent European settlement in the New World. And to explore further is to rediscover much of the nation's history, viewed through the prism of presidents' birthplaces, Revolutionary War and Civil War battlefields, the cradle of the Confederacy, historic plantation homes, and more. From the colonial triangle of Jamestown-Yorktown-Williamsburg to the coal-mining towns and rural farmlands of Appalachia, historic Virginia unfolds before us in this photographic tour led by Virginia natives Pat and Chuck Blackley. Along with the state's cultural riches, the Blackleys show us the breathtaking beauty of scenic Virginia, with its pristine beaches, coastal tideplains, lush forests, and rolling mountains, including the spectacular Blue Ridge Parkway and Shenandoah National Park. Our Virginia, is a statewide adventure, a multifaceted celebration of our nation's true birthplace in all its historic, cultural, and natural splendor.

With a quarter of a century behind it, Norfolk Southern is one of the oldest Class 1 railroads operating in North America. This illustrated history tells how Norfolk Southern came to be what it is today, from the merger of two of American railroads most legendary roads--Southern Railway and Norfolk and Western--through its rise to the heights of the world's leading transportation companies. After a concise history of the roads that became Norfolk Southern, author Richard Borkowski explores the railroads corporate history and operating structure and details the specific operations that go into the lines customer-oriented approach, including its vast intermodal network. Along with each of Norfolk Southern's 11 operating divisions, this book offers a close look at NS motive power, a wealth of color photographs, and a specially commissioned system map.

Part of John Muir's appeal to modern readers is that he not only explored the American West and wrote about its beauties but also fought for their preservation. His successes dot the landscape and are evident in all the natural features that bear his name: forests, lakes, trails, and glaciers. Here collected are some of Muir's finest wilderness essays, ranging in subject matter from Alaska to Yellowstone, from Oregon to the High Sierra. This book is part of a series that celebrates the tradition of literary naturalists—writers who embrace the natural world as the setting for some of our most euphoric and serious experiences. These books map the intimate connections between the human and the natural world. Literary naturalists transcend political boundaries, social concerns, and historical milieus; they speak for what Henry Beston called the “other nations” of the planet. Their message acquires more weight and urgency as wild places become increasingly scarce.

Children will see the natural world around them with brand new eyes, as they learn to follow its signs, hear its language, and understand its

secrets. With this unique and compelling book written by expert environmental educator Devin Franklin, kids aged 8 to 13 will build their own relationship with nature through finding a “Sit Spot” — an outdoor space in the backyard, in a field or in the woods, in a vacant lot or a city park — where they can stop, observe, and become familiar with the flora and fauna that live there. From the Six Arts of Tracking (Who, What, Where, When, Why, and How) and making a habitat map to walking in smooth silence like a fox and learning the basics of bird language, exploration exercises lead young readers on a fascinating journey of discovery as they watch, listen, map, interpret, and write about the sounds, sights, scents, and patterns they encounter. With prompts and write-in spaces for journaling, map-making activities, and observational tracking throughout, *Put On Your Owl Eyes* is an interactive and thought-provoking guidebook.

"There's a conviction among many sustainable agriculture advocates that the best way to move agriculture forward is to look back. The hope is to return to an exalted era in agriculture, to the kind of rural scene fit for a Rockwell painting or a Shaker Village—to food grown the old fashioned way. *Breaking Through Concrete* is not that, which is exactly the point. This ode to urban farming is not nostalgic (those are skyscrapers in the background, not silos), but instructive. It's a beautiful, gritty and very real portrait of the possibilities for the future of food." — Dan Barber, Executive Chef & Co-owner of Blue Hill "A road map to the future of America. A blueprint of possibilities. A book full of remarkable stories of neighborhood visionaries, stories of people who grow community in their gardens. Where others see trouble, they see food and hope." —NPR's Kitchen Sisters "Finally, a book on the full continuum of urban agriculture in America, replete with inspiring images of the people and places behind today's city-grown food. Hanson and Marty tell these stories with such admiration for their subjects you'll want to bestow hero status to city farmers." —Darrin Nordahl, author of *Public Produce: The New Urban Agriculture* "Breaking Through Concrete will satisfy readers hungry for a broad perspective on urban agriculture. The beautiful stories and photographs of successful programs throughout North America, combined with practical 'how to' guides, provides a valued resource for practitioners, advocates, scholars, and gardeners." —Laura Lawson, author of *City Bountiful: A Century of Community Gardening in America*

As seen on PBS's *American Spring LIVE*, the award-winning author of *The Triumph of Seeds and Feathers* presents a natural and cultural history of bees: the buzzing wee beasties that make the world go round. Bees are like oxygen: ubiquitous, essential, and, for the most part, unseen. While we might overlook them, they lie at the heart of relationships that bind the human and natural worlds. In *Buzz*, the beloved Thor Hanson takes us on a journey that begins 125 million years ago, when a wasp first dared to feed pollen to its young. From honeybees and bumbles to lesser-known diggers, miners, leafcutters, and masons, bees have long been central to our harvests, our mythologies, and our very existence. They've given us sweetness and light, the beauty of flowers, and as much as a third of the foodstuffs we eat. And, alarmingly, they are at risk of disappearing. As informative and enchanting as the waggle dance of a honeybee, *Buzz* shows us why all bees are wonders to celebrate and protect. Read this book and you'll never overlook them again.

Home to Jamestown, the first permanent English settlement in the New World, Virginia is in many ways the birthplace of America and the home of U.S. history. It is also literally the birthplace of eight presidents and numerous Revolutionary and Civil War heroes. Virginia was among the wealthiest southern states in the antebellum period, resulting in a long tradition of stately homes on luxuriant plantations. In addition to their elegant architecture and classic southern styling, these homes feature some of the most extravagant and noteworthy gardens

on the eastern seaboard. From the James River Plantations to the Shenandoah foothills, Virginia's Historic Homes and Gardens celebrates the legendary houses and landscapes of Old Dominion. Virginia natives, the authors travel throughout the state to highlight the best of the famous and lesser-known homes. Including such national landmarks as George Washington's Mount Vernon and Thomas Jefferson's Monticello, the book brilliantly illustrates the homes' exteriors and interiors as well as their gardens and landscaping. Historical details accompany the exquisite color photographs, along with useful information on each site's location.
