The PSR-200/PSR-300 [TRANSPOSE] buttons makes it possible to shift the pitch of the entire keyboard up or down in semitone intervals up to a maximum of 12 semitones (one octave). Transposing the pitch of the PSR-200/PSR-300 keyboard makes it easier to play in difficult key signatures, and you can simply match the pitch of the keyboard to the range of a singer or other instrumentalist.

PSR-3000 MegaPlus Style Collection (Nov 2010) Yamaha changed the basic file format with the Tyros3. This new format is continued in the PSR-S910/S710 keyboards and the CVP509 keyboard. Converting these new styles to a format that can be used in the 3000 is much more difficult and does take a bit of time.
